

Security

Solution Guide

# Preparing for the next wave of cyberattacks

### How Safe is Your Network?

Today, network attacks have become more sophisticated and targeted. Social networking applications have also opened up more channels for data breach than ever before. With the rise of BYOD (Bring Your Own Device), threats to business networks come from both outside and inside. It is now increasingly challenging for businesses to keep up with the changing threat landscape; and this is especially true for small-and medium-sized businesses, which do not have the staff and resources of larger corporations. Small-and medium-sized businesses need a solution that is efficient, inexpensive and provides an array of techniques to combat sophisticated network attacks.

### Network Security that Works

Businesses rely on network security appliances for two main reasons: to protect company resources from threats and enable secure communication between locations via VPNs. Zyxel has a proven track record with the highly-regarded ATP and USG FLEX series, providing effective protection against emerging threats over the years. Now, introducing our new SCR series: subscription-free, easy-to-manage network security in a single cloud router solution for teleworkers and small businesses/offices. Experience peace of mind with Zyxel's SCR series, empowering you to focus on your work without compromising security.

ZYXEL

### A Simpler Approach to WiFi 6E and Security

SCR 50AXE Secure Cloud-managed Router

### **Zyxel Security Portfolio**

	Model Series		
	Security Bundled	Flexibility	Essential & Handy
Users	АТР	USG FLEX	SCR
Up to 500	ATP800	/	
Up to 350	ATP700	USG FLEX 700	
Up to 200	ATP500	USG FLEX 500	
Up to 50	ATP200	USG FLEX 200	
Up to 25	ATP100	USG FLEX 100 USG FLEX 100AX	
Up to 15		USG FLEX 50 USG FLEX 50AX	
Up to 5			SCR 50AXE

# **Zyxel security solutions**

### **ATP Firewalls**

The ZyWALL ATP Firewall Series is empowered with smart cloud intelligence giving seamless protection against all those Advanced Persistent Threats, achieving ultimate in-depth defense of future unknown attacks.

### **USG FLEX Firewalls**

The USG FLEX series provides cloud-based management and collaborative protection for small and mid-sized businesses. It offers powerful UTM performance with automatic responses to expand protection from firewalls to access points, all while minimizing computing power usage.

### **Security Router**

The SCR series is a secure cloud-managed router that offers business-class firewall, VPN gateway, latest WiFi technology, and built-in security to safeguard against ransomware and other threats. It's a perfect solution for teleworkers or small businesses/offices looking for easy-to-manage and subscription-free network security.

### Security Services and Licenses

Find the perfect licensing option for your security devices with our flexible options tailored to meet your business needs. Our security licenses cover a range of solutions, including security, connectivity, management, reporting, and vertical-specific licenses. With our expert guidance and support, you can rest assured that your business is fully protected from all potential security threats, now and in the future.

### **Security Services and Licenses**

For purchase/renewal of licenses, go directly on our new e-commerce platform Zyxel Marketplace or contact our reseller.

Services	Key Features
Security Service	
Anti-Virus/Malware	Scan files for viruses, Trojan, worms, malwares before they reach your network. • Stream-based scan technology without file size limitation • Daily data feed of top-ranked threats
Anti-Spam/Email Security	Fast detect with cloud-based database/mail fingerprints to block spam/phishing mail with malicious contents • IP reputation filter provides low latency reaction • Support black/white listing for custom policies • Cloud-based database provide real-time protection
Web Filtering	Cloud-based real-time access control for inappropriate, unproductive, illegal and malicious websites • Categorized website access management for increased efficiency • Granular policies controlled by IP address, user, group, or schedule
IPS	Deep-packet inspection across all ports and protocols at gateway to against known attacks from network • Shields vulnerabilities before they can be exploited and eliminates the operational pains of emergency patching • Customized signature support to create your own rules • Constant signature auto-updates
Application Patrol	Automatically categorize and manage the network applications usage • Granular policies control by IP address, user, group, schedule • Profile based policy to ensure network quality and easy manage business rule
Geo Enforcer	Manage network traffic by mapping IP address to geographical regions to prevent fraud or cyber attacks • Geographical visibility for traffic statistics and logs • IPv6 address support • Automatic IP/geography database update

Services	Key Features
Security Service	
Sandboxing	<ul> <li>Cloud-based sandbox technology against unknown threats</li> <li>Comprehensive inspection for a wide range file types</li> <li>Cloud-based sandbox provide instant protection without needing a dedicated hardware or software upgrade</li> </ul>
Reputation Filter	Block botnet infection and prevent drive-by download from infected websites • IP/URL feeds to detect/block botnet commands and control activities • Cloud-based URL feeds to block access to anomalous websites • IP-based reputation filter • Supports 10 Cyber Threat Categories • Inbound & Outbound traffic filtering • Blacklist and whitelist support
Secure WiFi	<ul> <li>Secure tunnel and managed AP service</li> <li>L2 access between home and office network</li> <li>Enforcing 2FA with Google Authenticator</li> <li>WPA2 Enterprise (802.1x) supported</li> </ul>
Cloud Security Service	
Astra	<ul> <li>Cloud-based service and email protection for Office 365, G Suite and on-premise e-mail</li> <li>Stop unwanted spam, phishing and malware with real-time threat intelligence</li> <li>No change to your existing infrastructure, zero maintenance</li> <li>Reduce management overhead and stop wasting IT admin resources</li> <li>Respond faster with web management and monitoring</li> </ul>
Cloud Email Security	<ul> <li>Extend protection to mobile devices into network</li> <li>Shows brief summary about the member activities</li> <li>Monitor and analyze the usage and measure most used resources</li> <li>Stop users from unsafe websites, record every attempt, and trigger time</li> <li>Block, record all suspicious IP to get full range security monitoring and protection from online threats</li> </ul>
Vertical Solutions	
Hotspot Management	<ul> <li>Authentication with Wall Garden</li> <li>Advertisement and SMS billing &amp; free time service accounting for guest</li> <li>Support SP350E printer manager support purple WiFi and third-party social log in</li> <li>Billing replenishment</li> </ul>

Services	Key Features
Vertical Solutions	
Managed AP Service	<ul> <li>Integrated AP controller as central management to provide flexible deployment options</li> <li>AP auto discovery and provisioning</li> <li>AP forwarding compatibility</li> </ul>
Device High Availability Pro	<ul> <li>Device failure detection and notification</li> <li>Configuration auto-sync and link monitoring</li> <li>Smart handover through dedicated Heartbeat Link</li> <li>NAT/Firewall/VPN Sessions synchronization</li> </ul>
VPN Client Software	
SecuExtender VPN Client	<ul> <li>Providing solutions of both SSL VPN and IPSec VPN remote access</li> <li>Enhanced layered security incorporating Zyxel security appliances</li> <li>Easy and intelligent installation</li> </ul>
Network Premium	
Single Sign-On	<ul> <li>Simplified single sign in to multiple resources</li> <li>Improved user experience without repetitive logging in between various web browsers</li> <li>Login mechanism works with any protocol, not just HTTP</li> </ul>
Management & Reporting	
Cloud CNM SecuReporter	<ul> <li>Multidimensional analytics on abnormal behaviors</li> <li>Cloud-based real-time monitoring and alerts</li> </ul>

- Cloud-based real-time monitoring and alertsEffective event correlation and user behavior analytics
- Intuitive dashboard and customizable report

## Pick a bundle. No more hassle

### License by Bundle

A bundle license consists of multiple services that are grouped together. They are designed for your best convenience when you need to ensure your network is empowered with holistic functionality such as seamless threat protection or full connectivity features. Pick the right bundle and experience less hassle.

		Security
